About Us

Medicover Genetics is a leading healthcare company specialising in genetic medicine, with more than 25 years of experience.

Medicover Genetics offers genetic testing services and genetic counselling, proprietary CE-IVD marked solutions and a unique Technology Transfer Platform. Active in over 30 countries across Europe, Asia, and Africa, we empower laboratories, healthcare professionals and patients to place genetics at the core of medical decisions. Committed to enhancing health and well-being, we provide meaningful, actionable diagnostic solutions, improving disease prognosis, clinical management, and therapy selection for genetic disorders. Our CAP-accredited, CLIA-, GMP- and ISO9001, 15189, and 13485 certified laboratories ensure the highest quality standards. www.medicover-genetics.com

Medicover Genetics is part of Medicover, a leading international healthcare and diagnostic services company founded in 1995 and listed on Nasdaq Stockholm. www.medicover.com
